DETAILED ACTION

This action is responsive to the amendment/RCE filed 4/10/2006 and 5/09/2006 respectively. Claims 7-13 and 15-16 are allowed.

Continued Examination Under 37 CFR 1.114

1. The request filed on 05-09-2006 for a Request for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 10/667,215 is acceptable and a RCE has been established. An action on the RCE follows.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the prior art fails to anticipate or render obvious the combination of a regulatable CVT as set forth in claims 7, 15 and 16, and most significantly requires an encircling device including a nozzle which includes a plurality of discharge openings spaced along and communicating with a fluid passage having a flow diameter that diminishes in the flow direction between discharge openings so that each flow diameter produce a fluid flow rate and a cross-section area of the flow diameter is constant. In claim 15, the initial diameter of the fluid supply passage defines a cross-section, which corresponds to at least to the sum of a cross-section of each first and second discharge opening. In claim 16, the fluid passage communicating with only the first and second discharge openings with the first discharge opening being axial spaced from the second discharge opening.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
